Professional Summary

Results-driven **Data Engineer** with 6+ years of experience building production-grade enterprise data products using **SQL**, **AWS**, **Snowflake**, and **GCP**. Expert in designing robust connectivity solutions, enabling AWS SMUS capabilities, and implementing comprehensive data protection and restricted access mechanisms. Strong communicator skilled at translating complex requirements into scalable technical pipelines across cross-functional teams.

Work Experience

Senior Product Analyst | PayPal **04/23 - Present | Bangalore**

- Led **data engineering** initiatives by developing reliable **connectivity solutions** for seamless data flow across **AWS**, **Snowflake**, and **GCP** environments.
- Designed and maintained scalable, high-volume data pipelines using advanced **SQL** and **SQL Server**, ensuring high availability and optimized consumption processes.
- Implemented **data protection** frameworks and enforced **restricted data access mechanisms** to ensure compliance with enterprise security standards.
- Engineered the technical enablement of **AWS SMUS** capabilities, streamlining consumption patterns for various product and analytical teams.

Product Analyst | OLX Autos **07/22 - 03/23 | Gurgaon**

- Acted as a strategic data partner, utilizing **SQL** and cloud-native tools to provide deep-dive analysis on sales funnels and performance attribution.
- Collaborated with engineering teams to build **connectivity solutions** capturing disparate sales data into a centralized, single source of truth.
- Facilitated strong communication across sales leadership, translating complex business problems into actionable technical implementations and workflows.

Business Analyst | Uber **08/21 - 07/22 | Hyderabad**

- Managed and built **end-to-end data pipelines** incorporating extensive **SQL** optimization to ensure fast, reliable client data accessibility.
- Automated 35+ critical business operations using **Python** and data integrations, supporting regional leadership scaling efforts.

Analyst | Aditya Birla **07/18 - 07/21 | Bangalore**

- Analyzed process and decisioning data to identify inefficiencies, utilizing **SQL** and quantitative methods to recommend data-driven operational redesigns.

Skills

- AWS, Snowflake, GCP, SQL, SQL Server, Python (Pandas/Scikit-learn), R, PySpark, Airflow, dbt, Git, End-to-End Data Pipelines, Data Protection, Restricted Access Mechanisms, Compliance Monitoring, AWS SMUS, Stakeholder Management, Decisioning Disciplines.

Education

BITS Pilani | B.Tech - Chemical Engineering **2014 – 2018**

- **Certifications:** Google Data Analytics Certificate (Coursera)
