Professional Summary

Results-driven **Senior Product Analyst** with 6+ years of experience in **Client Analytics**, **Sales Operations**, and **Data Strategy**. Expert in translating complex datasets into actionable insights to drive **Revenue Growth**, **Client Retention**, and **Cross-Selling** opportunities. Proven track record at **PayPal**, **OLX**, and **Uber** in building scalable **Looker/Tableau dashboards**, managing **end-to-end data pipelines**, and partnering with global leadership to optimize commercial performance. Skilled in **SQL (BigQuery)**, **Python**, and **Predictive Modeling** to solve complex business challenges in a fast-paced, distributed environment.

Work Experience

PayPal | Senior Product Analyst | Bangalore | 04/2023 – Present

- Partnered with **Client Coverage** and Product teams to analyze **client revenue** and **product usage**, generating insights that drove a 15% increase in **cross-sell** opportunities.
- Designed and maintained comprehensive **dashboards** (Tableau/Looker concepts) to enable **self-service analytics** for relationship managers, ensuring real-time visibility into **client health**.
- Automating reporting frameworks using **Python** and **SQL** to track **OKRs** and strategic campaign performance, reducing manual reporting time by 40%.
- Developed **predictive models** to identify **churn risks** and proactively recommend retention strategies for high-value accounts.
- Mentored junior analysts on **SQL optimization** and **data storytelling**, fostering a data-driven culture across the organization.

OLX Autos | Product Analyst | Gurgaon | 07/2022 – 03/2023

- Acted as a strategic partner to the sales leadership, providing deep-dive analysis on **lead conversation** and **sales funnel efficiency**.
- Optimized **resourcing** and sales operations by developing a reporting framework that highlighted **team performance** and **revenue attribution**.
- Collaborated with engineering to ensure **data accuracy** and maintain a **single source of truth** across all sales and client reporting systems.

Uber | Business Analyst | Hyderabad | 08/2021 – 07/2022

- Supported the **Uber for Business (U4B)** client strategy, analyzing **B2B customer behavior** to inform **sales & account management** initiatives.
- Built and managed **end-to-end data pipelines** to ensure client data accessibility, enabling faster decision-making for regional leadership.
- Automated 35+ critical business reports using **Python (Pandas)**, allowing the team to focus on strategic analysis rather than data gathering.

Aditya Birla | Analyst | Bangalore | 07/2018 – 07/2021

- Analyzed process data to identify inefficiencies, recommending **strategic improvements** that optimized operational costs and improved margins.
- Utilized quantitative methods to support **business decision-making**, ensuring alignment with broader organizational goals.
