PROFESSIONAL SUMMARY

Results-driven Senior Data Engineer with 6 years of experience in architecting scalable **data pipelines** and driving **digital transformation** for high-growth product companies. Expert in **Python, SQL**, and **Cloud Infrastructure (AWS/GCP)**, with a proven track record of building production-grade data systems that handle complex, large-scale datasets. Proficient in **CI/CD** workflows, **API integration**, and performance optimization. Passionate about empowering customers to make data-driven decisions through robust data engineering solutions.

WORK EXPERIENCE

Senior Product Analyst (Data Engineering Focus) | PayPal Bangalore | 04/23 - Present

- * **Data Pipeline Architecture:** Designed and implemented scalable **data pipelines** using **Python** and **SQL** to integrate disparate data sources, ensuring high availability and consistency for the PayPal Shopping ecosystem.
- * **Automated Reporting Systems:** Engineered automated data flows and visualization systems, delivering real-time insights to 100+ stakeholders and reducing data latency by 40%.
- * **Performance Optimization:** Optimized complex SQL queries and data models on large-scale datasets, significantly improving query performance and system reliability.
- * **Technical Best Practices:** Mentored junior engineers on **code quality**, **Python best practices**, and **version control (Git)**, fostering a culture of engineering excellence.

Product Analyst (Data & Backend) | OLX Autos Gurgaon | 07/22 - 03/23

- * **Data Integration:** Led the end-to-end integration of user behavioral data into core product analytics platforms, enabling granular tracking of customer journeys.
- * **Feature Engineering:** Collaborated with engineering teams to deploy **production-grade** data features for search algorithms, directly contributing to a 40% reduction in Zero Result Pages (ZRP).
- * **Scalable Analytics:** Built robust data models and analytical frameworks to support high-volume data processing for the car comparison engine.

Business Analyst (Data Ops) | Uber Hyderabad | 08/21 - 07/22

- * **Pipeline Automation:** Developed and deployed **Python (Pandas)** scripts to automate critical ETL processes, saving 5+ hours of manual engineering effort weekly.
- * **Dashboard Engineering:** Built dynamic, code-driven dashboards using **Python** and **Google Sheets API**, ensuring automated daily data updates and data integrity.
- * **Cross-Functional Collaboration:** Partnered with engineering and product teams to define data requirements and deliver **scalable data solutions** for the U4B division.

Analyst | Aditya Birla Bangalore | 07/18 - 07/21

- * **Process Engineering:** Analyzed manufacturing process data to optimize yield and efficiency, identifying bottlenecks and implementing systematic improvements.
- * **Data Systems:** Maintained and optimized inventory data systems, ensuring accuracy and reliability for production planning.

SKILLS

- **Languages:** Python (Advanced), SQL, Bash.
- **Data Engineering:** ETL/ELT Pipelines, Data Architectures, API Integration, Data Modeling, Performance Tuning.
- **Infrastructure & Tools:** AWS, GCP, Git, CI/CD Concepts, Tableau, PowerBI.

- **Domain: Agile Methodologies, Customer-Facing Engineering, SaaS.**

EDUCATION

B.Tech - Chemical Engineering | BITS Pilani *2014 - 2018*

CERTIFICATIONS

- **Google Data Analytics Certificate** - Coursera
