PROFESSIONAL SUMMARY

Results-oriented Data Science & Analytics professional with 6 years of experience in **Python**, **Statistical Modeling**, and **Predictive Analytics** within high-growth product environments. Proven expertise in architecting data-driven solutions, designing rigorous **A/B tests**, and fine-tuning analytical frameworks to drive business impact. Adept at collaborating with cross-functional teams to deploy scalable **data pipelines** and deliver actionable insights for complex, large-scale problems. Committed to leveraging advanced data science techniques to solve critical business challenges.

WORK EXPERIENCE

Senior Product Analyst | PayPal Bangalore | 04/23 - Present * **Predictive Modeling & Strategy:** Spearheaded the design and execution of advanced **statistical models** and **A/B tests** to optimize product performance, directly influencing strategic roadmaps for PayPal Shopping. * **Data Architecture & Scalability:** Engineered scalable data visualization systems and **automated pipelines** using **Python** and Tableau, providing real-time visibility into 50+ KPIs for 100+ stakeholders. * **Advanced Analytics:** Leveraged **predictive analytics** to forecast trends and identify high-value business opportunities, resulting in optimized resource allocation and investment priorities. * **Technical Mentorship:** Led technical initiatives by mentoring junior analysts on **Python**, **SQL**, and **statistical best practices**, ensuring methodological rigor in data analysis and experimentation.

Product Analyst | OLX Autos Gurgaon | 07/22 - 03/23 * **Statistical Analysis & Optimization:** Conducted rigorous **hypothesis testing** and **statistical analysis** to reduce Zero Result Pages (ZRP) by 40%, significantly enhancing search algorithms and user engagement. * **Feature Engineering:** Led the analytics for a new car comparison feature, utilizing **customer behavioral data** to drive a 10% increase in lead generation through optimized feature placement. * **User Behavior Modeling:** Performed deep-dive analysis on **large-scale datasets** to model user friction points, providing critical data inputs for **product growth** initiatives and algorithmic improvements.

Business Analyst | Uber Hyderabad | 08/21 - 07/22 * **Automated Data Pipelines:** Developed and deployed robust **Python (Pandas)** scripts to automate complex data workflows, reducing manual reporting overhead by 5+ hours weekly. * **Dashboard Development:** Built dynamic, data-intensive dashboards using **Power BI** and **Python**, enabling automated daily data updates and ensuring data integrity for the U4B division. * **Data-Driven Decision Making:** Partnered with stakeholders to distill complex **statistical findings** into actionable business intelligence, driving operational efficiency and strategic alignment.

Analyst | Aditya Birla Bangalore | 07/18 - 07/21 * **Process Optimization:** Applied **data analysis** techniques to evaluate yield and process efficiency, identifying bottlenecks and implementing cost-saving measures through detailed inventory modeling. * **Operational Analytics:** Supported production operations by analyzing complex datasets to optimize process parameters and improve overall system performance.

SKILLS

- **Languages & Frameworks:** Python (Pandas, NumPy, Scikit-learn concepts), SQL, TensorFlow concepts, Git.
- **Data Science & Analytics:** Statistical Modeling, Predictive Analytics, A/B Testing, Hypothesis Testing, ETL Pipelines, User Behavior Analysis.
- **Tools & Platforms:** Tableau, PowerBI, Google BigQuery, AWS, GCP, Google Analytics, Excel.

EDUCATION

B.Tech - Chemical Engineering | BITS Pilani *2014 - 2018*

CERTIFICATIONS

- **Google Data Analytics Certificate** - Coursera
